The following code prevents users from dragging any of the fields to a different location or out of the pivot table. Sub EnableSelectionSelPF () EnableSelectionSelPF () Table tutorial by contextures.com DIM PivotTable Dim PF How Pivotfield On Error Returns Close Set Pt = ActiveSheet.pivottables (1) Set pf = en.pivotfields ("Region") pf.EnableItemSelection = true end sub restrict pivottable You can use a macro to disable many features on a pivot table. In addition, use the code to upgrade a pivot table in a protected worksheet for protection and restrictions on Pivot tables Data model, Go to the data model restrictions page of the Pivot table. SUB DESABALITEELECTIONSELPF () Pivot Table Tutorial by Contextures.com DIM Pivottures.com Like Pivotable Dim PF As Pivotfield on Error Summary Closing Set Pt = ActiveSheet.Pivottables (1) Set pf = en.pagefields (1) pf.enableitemselection = False Selection The following macro allows the features that were turned off in the macro of disostions, shown above. The zipped file is in XLSM format and contain macros. Use macros to protect a dynamic table or specific features from a normal pivot table (not data model). You can manually deprotect the worksheet, update the dynamic table, and then protect the sheet again. Disable the selection to protect the selections from the pivot table to be changed, you can use a macro to disable the selection. The following Dining table controls (and others) are disabled when a sheet is protected: Report layout subtotals and Grand Totals update Ungroup's pivottable group options calculate and calculate Pivottable item styles to use these features, temporarily deprotect the worksheet. SUB ALLOWPIVOTTABLESHEET () DIM PT SUCHING PIVOTTABLE DIM PF As Pivotfield Dim WS as Spreadsheet SET WS = HWSHET for each PT in WS.Pivottables with PT .NableWizard = True .enablelilst = true .EnableFieldDialog = true .PivotCache.enableFerefresh = true for each PF in pt.pivotfields < emon, e "serola" >< eman, es PF moc DragToHide = True End If End With Next pf End Sub All pivot tables in the active workbook To have the macro run on all pivot tables, on all worksheets, in the active workbook, add the line: dim ws as Worksheet At the beginning of the code, Add this row For each ws in ActiveWorkbook.Worksheets At the end of the section, create a new row Next ws For example, here is the macro EnableSelectionAllPT, revised to run on all pivot tables, on all worksheets, in the active workbook. Another option, if you are trying to update the pivot table programmatically, is to unprotect all worksheets, update the pivot tables, and protect the worksheets again. NOTE: Pivot tables in other worksheets can also be limited if they are based on the same dynamic cache. Note: Instead of .PivotFields, you can use the pivot table tutorial .RowFields, .ColumnFields or .PageFields Sub RestrictPivotTable () by contextures.com Dim pf As PivotField On Error Resume Next With AtiveSheet.PivotTables (1).EnableDrilldown = False .EnableFieldList = False .EnableFieldDialog = False .PivotCache.EnableRefresh = False For Each pf In .PivotFields With pf .DragToPage = False .DragToRow = False .DragToColumn = False .DragToData = False .DragToHide = False End With Next pf End Sub Allow PivotTable The following macro enables features that have been disabled in the RestrictPivotTable macro, shown above. You can change the macros slightly, so that they run on all pivot tables in the active worksheet, or on all pivot tables, on all worksheets in the active workbook. PivotFields," add an If section...Then, to ensure that the code is not executed in the "Values" field (called "Data" in previous versions), which is created when there are multiple value fields. Sub EnableSelectionAllPT () tutorial tabela dinÁmica por contextures.com Dim pt As PivotTable Dim pf As PivotField On Error Resume Next For each pt in AtiveSheet.PivotTables For Each pf In pt.PivotFields pf.EnableItemSelection = = Next PF Next en End Sub Note: If you are using á € œFor Each PF in PT. To do this, run Macro DisableSelection (above), and then run this enableselectionselpf macro. Note: Instead of .PivotFields, you can use .rowfields, .ColumnFields or .PageFields Sub DisableSelection () á € Die Table Tutorial by contextures.com DIM PivotTable Dim PF Pivotfield on Error Resume Next Set = ActiveSheet.pivottables (1) for each f in pt.pivotfields pf.enableitemselection = false next pf end sub Note: You can also disable the selection for a specific field. Watch this video to see how to configure the protections, and there are written details below the video. If you are trying to upgrade the dynamic table with a macro, add code to unprotect the worksheet, update the dynamic table, and then protect the worksheet again. The drop-down arrows are visible again. More dynamic table tutorials FAQs á € "Dining tables Die table Data Model Restrictions Dynamic table Introduction The Data Grouping Dining Cache Macros Various Consolidation Ranges Running Totals Suma Functions Clear Old Items in the Die Table UNPROTECTREFRESHALL () DIM WS as a spreadsheet in error resumption for each WS in ActiveW WSBook.Worksheets ws.desprotoger Password: = á € MyPasswordá € Close WS ActiveWorkbook.Refreshall for each WS in ActiveWorkBook.Friends work WS.Protect Password: = á € MyPasswordá € , AllowusingPivottables: = True Next WS End SUB Get the sample file Get the sample dynamic table tutorial. You can protect a spreadsheet and allow users to make some changes to the dynamic tables. For example, you are able to move the fields to a different area. In this example, the arrow is removed from the first field of Report Filter (PageFields). Note: Instead of you can use .RowFields, .ColumnFields or .PageFields Sub EnableSelection () - PivotTable Tutorial by contextures.com Dim pt As PivotTable Dim Dim As PivotField On Error Resume Next Set pt = ActiveSheet.PivotTables (1) For Each pf In pt.PivotFields pf.EnableItemSelection = True Next pf End Sub Note: You can also enable selection for a specific field. In order for the macro to run on all of the din tables in the active worksheet, remove the row: Set pt = ActiveSheet.PivotTables (1) and replace it with For each pt in ActiveSheet.PivotTables At the end of the section, create a new row Pr't pt For example, here is the EnableSelection macro, revised to run on all devot tables in the active worksheet. Even if you do not allow the use of dynamic tables in a protected worksheet, there are µ limits to what you cannot do. Be sure to enable macros when opening the file if you do not want to test macros. Note: Instead of .PivotFields, you cannot use .RowFields, .ColumnFields, or .PageFields Sub AllowPivotTable () áEnabletutorial of the table dinÁval by contextures.com Dim pt As PivotTable Dim pf As PivotField On Error Resume Next Set pt = ActiveSheet.PivotTables (1) With .EnableDrilldown = True .EnableFieldDialog = True .PivotCache.EnableRefresh = True For Each pf In pt.PivotFields With pf .DragToPage = True .DragToRow = True .DragToColumn = True .DragToData = True .DragToHide = True End With Next pf End With End Sub Sub Change Macro to Run on All Pivot Tables or Sheets Macros in previous µ are set to run on the first dinÁmica table in the active worksheet. This macro shows an example. It also prevents them from using the Field List, Field µ, or Execution, and disables the Update functionality.
